

East Side Walk around April 26 9:30am

Walk around was cut short due to Weather

Matt, Wendy Draina, Maureen Hooper

Overall the Community looks good, the lawns are green (rain is helping) the common ongoing issue is broken or malfunctioning irrigation heads. Last application of Fertilizer for the season will be completed in May. Pruning will be in approx. 3 weeks.

Issues:

- One house on 19th Ave – lawn browning - timer was turned off – Matt reset timer.
- 3 broken irrigations heads were noted – all were repaired.
- Matt is watching Mexican Heather plantings at house on 19th Ave, has communicated with owner.
- House on 85th Ct has Dollar weeds – unable to see during the walk (lightening) – Matt will follow up

Reminder to Home owners: Queen Palms are trimmed once a year in the fall. If your Palm needs seed pods or branches removed it is the homeowner's responsibility.

Next ECLS meeting will be May 16, 2019
